Product Information

Catalog Number	BP61907
Product Name	Anti-GGCX antibody
Description	<p>GGCX (Gamma-glutamyl carboxylase) is also named as GC and belongs to the vitamin K-dependent gamma-carboxylase family. This 94 kDa (including all modifications, such as the five N-linked glycosylations), is a 5-pass transmembrane protein and a key regulator of blood coagulation residues with the concomitant conversion of the reduced hydroquinone form of vitamin K to vitamin K epoxide. Defects in GGCX are a cause of combined deficiency of vitamin K-dependent clotting factors type 1 (VKCFD1) and pseudoxanthoma elasticum-like disorder with multiple coagulation factor deficiency (PXEL-MCFD).</p>
